

EVenture

SOLVING RANGE ANXIETY THROUGH
AN INTELLIGENT MOBILE APP INTERFACE.

**"The best thing for
EV's since the j1772"**
– Pac Mech Tech

PROBLEM

- Before leaving for a trip, you research the area for working chargers
- Currently no way to automatically get route options based on station location and vehicle state of charge.

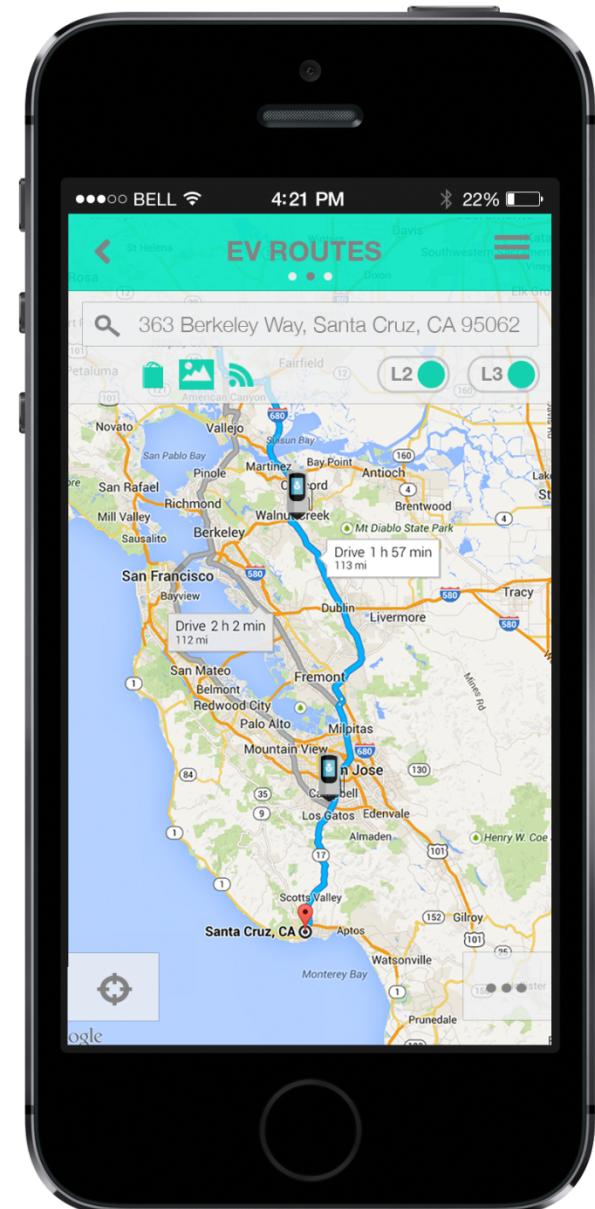

EXISTING SOFTWARE

- Manually decipher best route
- Does not take vehicle information into consideration
- Does not account for environmental conditions

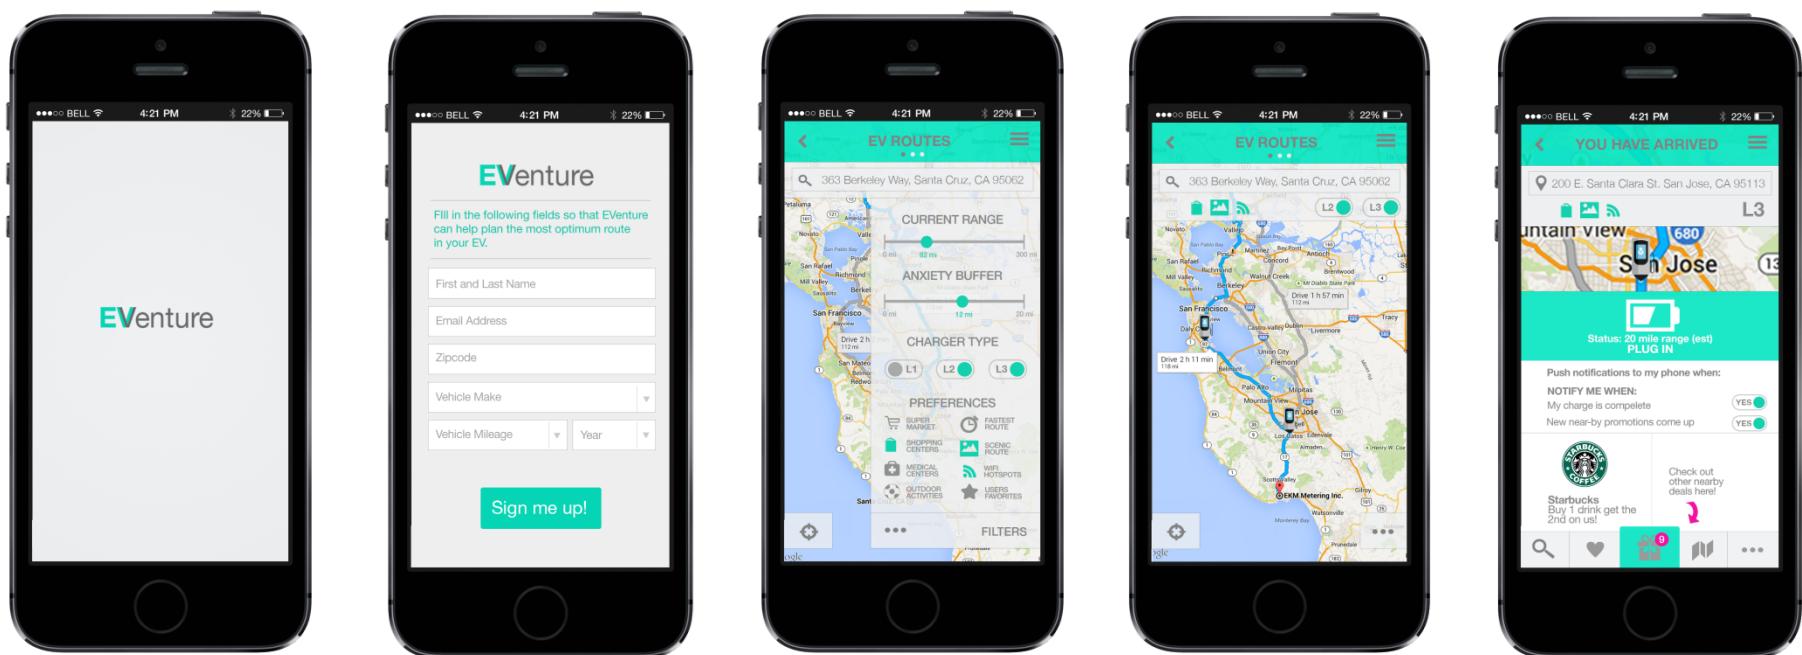

EVenture

- Let EVenture suggest alternative routes putting you near a charger when YOU need it!
- EVenture utilizes your vehicle information, and real time data to suggest the best route, NEVER to leave you stranded!

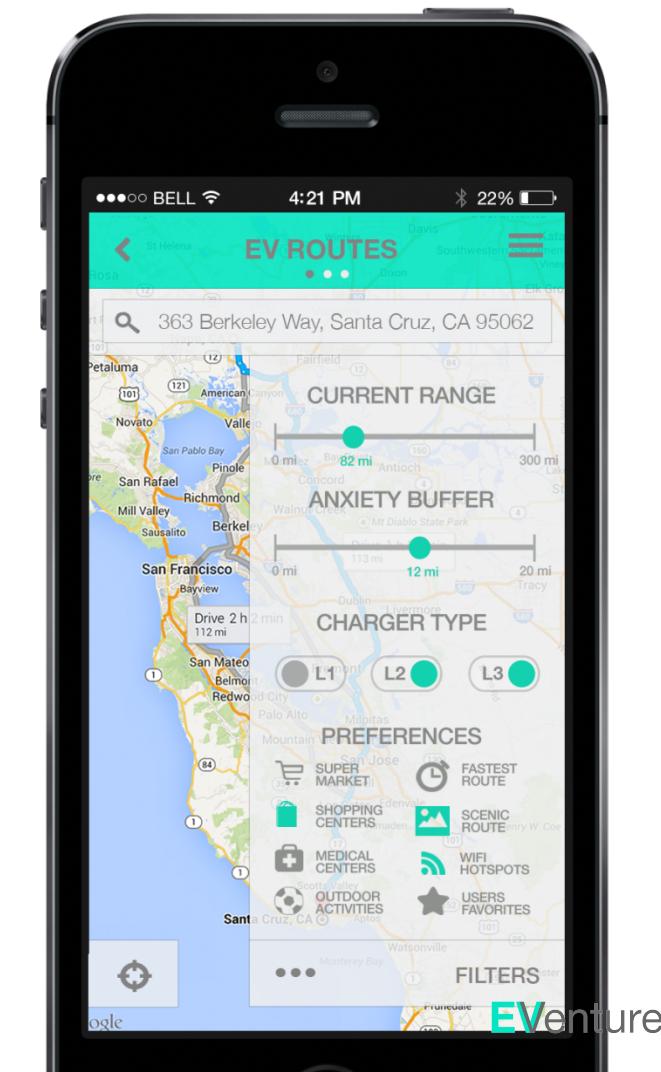

HOW TO USE:

- A. Create an account
- B. Enter vehicle information
- C. Search routes for your next EVenture!

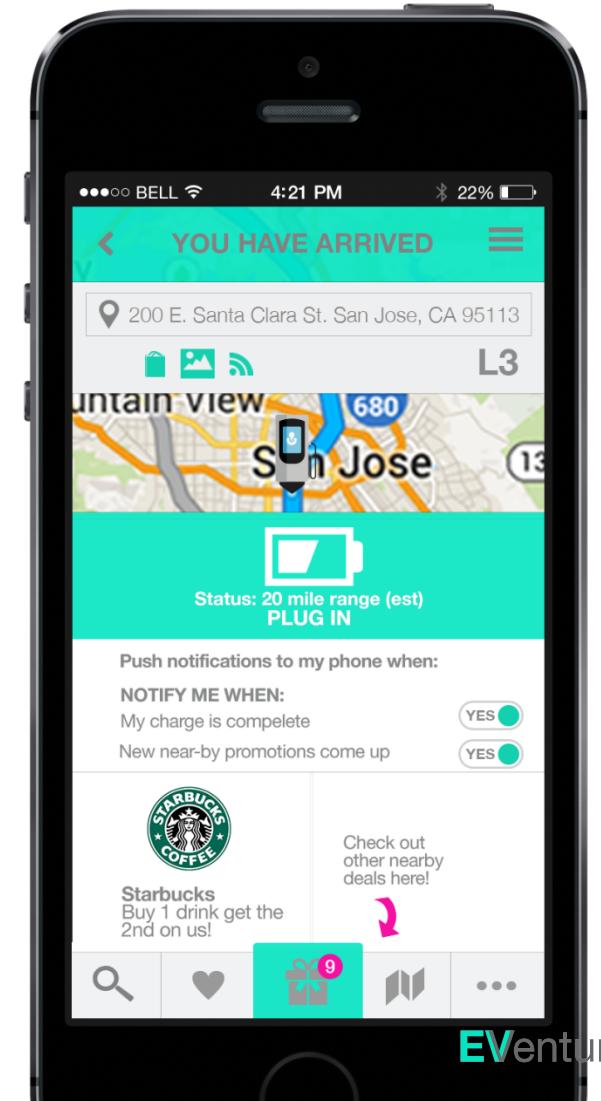

FEATURES

- Uses information off your dash display to increase accuracy of the route
- Uses location data to leverage current weather conditions increasing route accuracy
- Slider to alter ‘Anxiety Buffer’ moving estimated charge destinations

REVENUE

- Uses your location data to push targeted advertisements
- Utilizes ads to generate revenue making the services FREE to the users
- Revenue based on total impressions and clicks of ads
- National sponsors support the app with annual service fee

TIME TO MARKET

AVAILABLE IN:

TEAM

- **Michael Menendez**
idea / frontend
- **Charles d'Harcourt**
backend developer
- **Mohinish Shaikh**
frontend developer
- **Geoff Ryder**
backend developer
- **Baswaraju Vuppala**
backend developer
- **Katarzyna Babula**
frontend / graphic design
